## **EDUCATION**

**Software QA CO-OP** 2023 – Present Day Canadian Collage of Technology and Business.

Bachelor's degree in Mechatronics Engineering. Universidad Autónoma de Guadalajara - 2017-2021.

#### SKILLS

**Programming languages:** Python, JavaScript and Java

**Web Development:** HTML, CSS, React and Bootstrap.

Database Management: MySQL.

**Software Development Tools:** Git Bash, Github, GitLab, Visual Studio Code, Eclipse, Pycharm and Sublime Text.

**Backend Development**: Node.js and Django.

Agile and Scrum.

Problem-Solving and Analytical Thinking.

#### CERTIFICATES

Introduction to Computer Science – Currently doing. HarvardX

Python Bootcamp – June 2023.

**The Complete Web Developer** – June 2023.

Java Programming Masterclass - May 2023.

### **SUMMARY**

Dedicated and self-motivated software developer. Seeking a challenging and rewarding position where I can use my skills and talents to make a positive impact and with a strong desire to earn and keep growing. Proven ability to work independently and as part of a team while demonstrating ability to meet deadlines and work under pressure. Proactively stayed updated with the latest industry trends and emerging technologies. **Self-taught.** 

# **WORK EXPERIENCE**

# **Software Developer**

Subastas Ventura - December/2023 - July/2023.

- Engineered modern websites with Java, JavaScript, HTML and MySQL.
- Efficiently deployed and integrated software solutions developed by the team, ensuring seamless functionality and performance.
- Performed regular maintenance tasks, such as debugging and troubleshooting, to ensure smooth operation.
- Developed and implemented code for new features that significantly enhanced user engagement while aligning with the established requirements.
- Resolved critical issues related to open sessions and connections, significantly improving user experience, and minimizing disruptions also for development team.
- Utilized version control systems (such as Git) to manage codebase and enable efficient collaboration with other developers.
- Successfully deployed code changes to production environment, ensuring seamless integration of new features.

# **Software Engineer**

IBM October/2020 - October/2021

- Worked with Java and Mainframe, following the requirements that used to come to the team, for multiple purposes and clients.
- Gave maintenance to the code, finding bugs and keeping the applications with a good performance.
- Collaborating with an international team, giving feedback to get better practices.
- Developed and executed comprehensive test plans to ensure the quality and functionality of software.
